

Mock Accident *(gr. 9-12)*

On Wed., May 13, Columbus Catholic will host a mock crash simulation for students in gr. 9–12 to help raise awareness about the serious consequences of impaired and distracted driving. This educational event will include participation from several local emergency response agencies, including the Marshfield Fire Department, Marshfield Police Department, Sanford Health Marshfield Clinic, Life Link Air Medical Support, and the Wood County Sheriff's Department. We are very grateful for the time and support these agencies provide to help educate our students about making safe and responsible choices. Parents are also welcome to attend the simulation if they would like to observe the event. Because the simulation will include emergency vehicles, sirens, and other realistic elements, parents are encouraged to review the information in advance. Please see the link below for the parent letter that will be sent to all parents of students in gr. 9–12 next week.
