

Discovery Education Station

"Learning Through Exploration"

April 2024 Newsletter

About Discovery

Discovery Education Station, a Wisconsin-based, veteran and woman owned nonprofit (501(c)(3)), fosters an inclusive haven where kids of all ages explore STEA2M disciplines to ignite curiosity and inspire learning. We offer enriching classes, dynamic camps and engaging hands-on workshops and clubs. We prioritize creating a safe space for families with special needs children, nurturing well-being, life skills, and strong family bonds. Together, we empower minds and build connections for a brighter future.

~Science, Technology, Engineering, Art, Agriculture and Math~

STAFF

SPOTLIGHT

AARON ZENNER

Hello! I'm Aaron, and I work at Discovery through Americorps. Originally from Spencer, WI, I earned my bachelor's degree in History from UW-Madison. With experience as a vocational trainer and now as a special education paraprofessional, I'm committed to supporting students on their educational journey. I specialize in providing fun and engaging science activities to children at Discovery, fostering a love for learning in a nurturing environment. I look forward to meeting you and welcoming your kids to Discovery!

My role with Discovery Education Station is leading science classes. I develop curriculum and content for these classes and also teach the courses to students. I enjoy the challenge of developing fun and engaging science activities for the students. I will be assisting with a new program called MARS (Marshfield Aviation Rocketry Spaceflight Club) next month!

I was drawn to service by a desire to serve my community. During my service term, I have developed professional relationships with many people and organizations within the Marshfield area and have become much more connected to my community.

When not serving in AmeriCorps, I enjoy a wide variety of hobbies including playing piano, reading, and watching Wisconsin sports. He recently picked up astronomy as a hobby and just purchased his first telescope!
